19. Generator space (option).
20. Fold-out platform (Integrated gangway option).

DINE IN STYLE

"Why build an ugly looking yacht when you can build a beautiful one?" These words by our previous chief designer, Jens Östman, sum up the whole design philosophy of Sweden Yachts.

The sophisticated below-deck accommodations of the Sweden Yachts 54 are a masterpiece of interior design. This is where you can enjoy the good life at its best. The whole atmosphere is one of harmony and natural beauty. The carpentry is so skilled and meticulous that every wooden feature seems to have grown straight out of the solid timber. The generous portlights let the light stream into the saloon, accentuating the beauty of the appointments and the special Sweden Yachts 54 ambience.
